The following list is merely a guideline to assist you in determining values for your own items. The "estimate of average used goods" pricing was compiled from thrift stores, fair sales and other non-profit services. Expensive or new items would be higher in value and poorer quality items would be less. Individual items sold at auction or at yard sales could command higher pricing. Variables such as cost when new, antique value, age, condition or current "hot market" will alter any listed value. According to Federal Law, clothing and household goods must be in "good used condition or better" for tax deductions.
